## CTP/Climate Transition Plan

A **climate transition plan** is a crucial tool for organisations aiming to align with a net-zero carbon economy and limit global warming to 1.5°C.

Here are the key points:

### 1. **Purpose:**

A climate transition plan outlines how our organisation will pivot its existing assets, operations, and business model to align with ambitious climate science recommendations.

These recommendations include halving greenhouse gas (GHG) emissions by 2030 and achieving net-zero emissions by 2050 at the latest

### 2. **Components:**

- **High-Level Targets:**

- To instal solar Panels by 2030
- To consider electric vehicles for local deliveries

- **Financial Planning:**

- The company need to consider financial implications related to this transition.

- **Governance:**

- Clear accountability mechanisms ensure progress tracking by the Board of directors.

- **Policy Alignment:**

- We will be aligning with relevant policy goals of the NHS.

- **Strategy for Achieving Net Zero**

- We will outline how they'll achieve net-zero emissions

### 3. **Reporting and Accountability:**

We will disclose our climate transition plans to demonstrate commitment and progress.
